

Approved Clinical Learning Environment

Kent, Surrey and Sussex

Information for patients

This practice has been approved as a clinical learning environment by Health Education England working across Kent, Surrey and Sussex.

The practice has specific approval to train Foundation Year 2 doctors, who are doctors registered with the General Medical Council and undertaking their general training in preparation for training as specialists including becoming general practitioners.

Sometimes the doctor may wish to record their consultations and patients may therefore be asked to sign a letter of authorisation to permit this. Your permission will always be requested beforehand.

Further information about training in this practice is available from the receptionist.
